DESCRIPTION OF TRAILS

Please let wild animals remain wild. Feeding wild-life is prohibited and can result in harm to both animals and people. Animals who depend on handouts become a nuisance to park visitors and a danger to themselves. Please lock all food and coolers inside cars or campers.

This combination of a state park surrounded by a vast, working state forest provides a unique opportunity for viewing multiple-use management of natural and cultural resources. Outdoor enthusiasts will enjoy the wild diversity, long history and rugged beauty of southern Indiana at O'Bannon Woods State Park.

Interpretive naturalists offer year-round hikes, talks and other programs for visitors and groups. The Nature Center offers resource and cultural displays, live snakes and turtles, bird viewing, an outdoor wetlands pond and living-history demonstrations at a pioneer farmstead. Also featured is a one-of-a-kind, restored, historically accurate, 1850s hay press and barn with accompanying exhibits.

With the development of this new state park, we continue to offer high-quality activities and facilities for both new and returning visitors. Guests can enjoy a wide range of activities and facilities as described in an adjacent column of this brochure. Hunting, in compliance with established seasons, continues to be permitted in Harrison-Crawford State Forest, but not inside the state park.

The property name was changed in 2004 to honor the late Gov. Frank O'Bannon and his family for their contributions to this community and to the area's natural resources and history. The 2,000-acre site was established in 1980 in a peaceful and secluded setting, with the 24,000-acre Harrison-Crawford State Forest. It was operated by the Indiana DNR's Division of Foresty. The state forest, one of Indiana's largest, of Foresty. had been overfarmed and was bare of trees. The Department of Conservation, now the Department of Matural Resources, bought the first parcels of land for a state forest in 1932. The srea became popular through the work of the 517th Co. Civilian Conservation Corps beginning in 1934. These men planted many of the trees near the park entrance and throughout the forest. They built facilities, including shelter house 2, the property manager's residence, the service area and numerous retaining walls. The 517th camp, which hosted one of Indiana's few African-American CCC companies, sat where the group camp is located today.

O'BANNON WOODS STATE PARK

Nestled among the hills, rivers, and forests of extreme south central Indiana, O'Bannon Woods State Park is rich with resources dating back to prehistoric Native Americans. The stories of the region's history live on in the facilities and natural features of the park, which was formerly known as Wyandotte Woods State Recreation Area.

Native Americans mined the valuable bluish-grey Harrison County chert or flint from caves and fields for thousands of years to make spearpoints, knives, arrowheads and other tools.

Pioneer settlers traveled through the Ohio valley in the early 1800s to establish towns, businesses and early trading with riverboats coming up the Ohio River. A local button factory, lime kilns and haypress barns were sources for river-related income during the mid-to-late 1800s. Even today, visitors find stone foundations, cemeteries and historical structures scattered among the hillsides.

By the early 1900s, much of the area
